

BULLET BLOCKS

Introducing *Bullet Blocks:

Advanced Target Technology

This target system uses the most advanced technology available.

"NO RICOCHET"

This revolutionary material does not degrade from incoming projectiles. A cubic foot block can contain thousands of rounds depending on caliber.

"BULLET BLOCKS" will accept the following:

Stackable and designed to interlock

Approved Firearms Rim Fire	Approved Handguns
.22 Long	.38 SPL
.22 Short	.45 ACP
.22 Mag	.9mm
.17 HMR	.40 S&W
	.357 Mag
	7.62x25

- This is the only target system that allows you to create your own firing range by stacking and **interlocking multiple blocks
- Same design as sold to "Military Shoot Houses"
- Create your own backstop
- Light weight and portable
- Designed to interlock for a secure fit
- Encapsulates projectiles inside blocks
- Material environmentally friendly
